

While you are enjoying your summer sun, you will begin your AP chemistry journey. This first assignment will give you a foundation which will be built upon as we study AP chemistry. You have 4 tasks over the summer:

**I. Please visit the College Board AP Chemistry site:**

<https://apstudent.collegeboard.org/apcourse/ap-chemistry>

Scroll through the site and become familiar with the format of the AP Exam and the resources available on the website.

**II. [Join](#) my classroom on Google classroom.**

**III. Review Assignment - FlinnPrep and Slides**

- 1) Please create a student account at <https://www.flinnpavo.com>.
- 2) Fill in the following [spreadsheet](#) with your school email and name
- 3) Ma'ayanot is subsidizing the cost of FlinnPrep, but please pay \$25 for the program by using [this link](#) and specify that you are paying for AP Chemistry FlinnPrep. FlinnPrep will be activated once everyone has completed the above steps.
- 4) Please complete units 1-9 in the FlinnPrep module over the summer. Most of the material in these units is review, some is new. In addition, slides for chapters 1 and 2 of our AP Chemistry textbook are posted on Google Classroom. These chapters include material covered in your tenth-grade chemistry class and/or the Flinn Prep review. The first test of the year (which will take place 2-3 weeks after classes have begun) will include chapters 1 and 2 but we will NOT be reviewing those chapters in class. Any other material covered in Flinn Prep will also be reviewed in class.

**IV. Memorize the following solubility Rule:**

**All sodium, potassium, ammonium, and nitrate salts are soluble in water.**

Enjoy your summer! Looking forward to a challenging but great year of AP Chemistry!!
